## Career Summary

I am a highly skilled and motivated software engineer with over 5 years of experience in software development, specializing in web and mobile applications. I am proficient in various programming languages and frameworks, including Java, JavaScript, React, and Python. I am also dedicated to delivering high-quality software solutions that meet business requirements and exceed user expectations.

## Technical Skills

- |                                |                                                  |
|--------------------------------|--------------------------------------------------|
| • Web technologies:            | HTML5, CSS3, JavaScript (ES6+)                   |
| • Frameworks:                  | React                                            |
| • State Management:            | Redux, Redux Saga, Redux Toolkit                 |
| • UI Libraries:                | Material UI, Ant Design, Bootstrap, Tailwind CSS |
| • CSS Preprocessors:           | Sass, Less                                       |
| • Build Tools:                 | Webpack, Parcel                                  |
| • Unit Testing:                | Jest                                             |
| • E2E Testing:                 | Cypress                                          |
| • Version Control:             | Git (GitHub, GitLab, Bitbucket)                  |
| • CI/CD:                       | Jenkins, CircleCI, GitLab CI/CD                  |
| • Accessibility:               | WCAG 2.1, ARIA, screen readers                   |
| • Responsive Design:           | Media Queries, Flexbox, CSS Grid                 |
| • Performance Optimization:    | Lazy loading, code splitting                     |
| • Design Tools:                | Figma                                            |
| • Cross-Browser Compatibility: | Chrome, Firefox, Safari, Edge, IE                |
| • Server-Side Rendering (SSR): | Next.js                                          |
| • Mobile Development:          | React Native                                     |
| • Cloud Platforms:             | AWS, Azure, Google Cloud Platform                |
| • Content Management Systems:  | WordPress, Drupal, Contentful, Strapi            |

## **Experience**

**Onhova** (E-commerce)

***Oct 2021 – Apr 2023***

### **Technical Team Lead**

A cloud-based platform that provides tools and services for small businesses to set up an online store and streamline their sales, marketing, and customer engagement processes.

- Led a team of developers to design, develop, and maintain the platform
- Utilized various technical skills and tools, including ReactJS and Springboot.
- Participated in hiring and onboarding processes for new developers, and provided ongoing training and support to ensure the team was equipped with the necessary skills and knowledge to meet project requirements.

**T4O Technologies** (Mobility)

***Apr 2021 – Oct 2021***

### **Lead Frontend Engineer**

T4O is a cloud-based transport and logistics operating system built for African intercity transportation and logistics service providers.

- Led the frontend development team in the design and implementation of a modern and responsive user interface for the T4O transport and logistics operating system, utilizing ReactJS, TypeScript, and styled-components.
- Utilized frontend build tools such as Webpack and Babel to automate the build process and improve the development workflow for the frontend development team, allowing for faster and more efficient development and deployment of new features for the T4O user interface.

**InnovateOne** (e-commerce)

***Apr 2021 – June 2021***

### **Lead Frontend Engineer** (Contract)

In-house e-commerce project for the company's client

- Led the frontend development for an e-commerce platform, working with a team of designers, backend developers, and stakeholders to deliver a responsive, high-performance, and user-friendly website.
- I developed and implemented a modular and scalable frontend architecture using ReactJS and Redux, ensuring code reusability, maintainability, and extensibility.

**Kashbase (Fintech)*****May 2020 – Dec 2020*****Frontend Engineer**

Kashbase is a digital banking platform that provides individuals and businesses with an easy and secure way to manage their finances, including payments, transactions, and savings, all from the comfort of their mobile devices.

- Designed, developed, and maintained the front end of Kashbase's digital banking platform, using React and Redux to deliver a fast, reliable, and seamless user experience.
- I utilized a wide range of frontend technologies and tools, including HTML, CSS, JavaScript, React, Redux, and various libraries and frameworks, to build and maintain Kashbase's web applications.
- I worked closely with backend developers to ensure that frontend components integrated smoothly with server-side APIs and other backend systems.

**Semicolon (Edtech)*****Jan 2020 – March 2021*****Software Engineer**

Semicolon Africa is a social enterprise that provides training, and mentorship in software development.

- Proficient in Java, JavaScript, Python, React, Springboot, and Django, with hands-on experience developing projects in these technologies.
- Demonstrated ability to work effectively in team environments and collaborate with cross-functional stakeholders to deliver high-quality software products.
- Strong problem-solving skills and ability to learn quickly, with a passion for leveraging technology to drive innovation and create value for end-users.

**Orgboom (Edtech)*****Jan 2019 – Dec 2019*****Co-founder / CTO**

A pioneering initiative aiming to introduce software engineering education in Nigerian high schools, reduce computer illiteracy, and increase employment opportunities.

- Developed and managed an online learning platform enabling students to access courses, take tests, and submit assignments remotely.
- Proficient in HTML, CSS, JavaScript, React, Redux, and Node.js, utilizing these technologies to drive the success of Orgboom's educational initiatives.

**CleverSoftwares Solutions Ltd** (IT solutions)

***Mar 2018 – Sep 2018***

**Software Engineer**

A software development and design-centered agency in Africa for multinational companies.

We provide tailored design and software solutions for their business goals.

- Developed and maintained a Netlify-like frontend web application for one of our top customers using React and Redux.
- Developed and maintained backend web applications using PHP and MySQL
- I worked with a team of designers and developers to create tailored designs, and software solutions for the client's business goals.

**Education**

**Anambra State University**, Anambra State, Nigeria

Bachelor's in Computer Science

*2015–2019*

**Henley Business School**

Business administration and management

*2020*
